### Digital Photography Shooting Assignment

#### Activity 3: Using the Camera in Manual Mode for the First Time

#### Directions:

You will be required to submit **two** pictures of different subjects while using the camera manually. The first image should be taken with an **ISO of 200** and the other should be taken with an **ISO of 1600**. Think about the camera's sensitivity to light and be creative while picking your subject.

#### Tips/ Hints:

- Think about the ISO given and lighting requirements necessary.
- Consider "Camera Shake", no tripod will be used for this activity.
- Be sure to balance the light meter, you must use the ISO listed above.
- Consider composition, and filling the frame.

#### Process:

##### Day 1:

1. Set the Mode Dial to "**M**anual"
2. Reset your camera.
3. Set auto focus to AF area mode single point. (□)
4. Select two pictures of different subjects. One image must have an **ISO of 200** and the other with an **ISO of 1600**
5. Shoot a minimum of 3 subjects for each ISO setting given.

##### Day 2:

1. Transfer your images H: drive, label the folder "*Assignment 3*".
2. Select to images from each ISO setting and submit to the teacher via email using the following format:

**ISO 200 pic:** LastName\_FirstName\_Assign3A

**ISO 1600 pic:** LastName\_FirstName\_Assign3B

**Email subject:** LastName\_FirstName\_Assign3\_Per#
