Digital Photography Class Assignment
Creating a composite Photo using
Image Layers in Adobe Photoshop

Directions:

You will be required to create a composite picture using multiple images as separate layers

Procedure:

1. Download the “**Doghouse in back yard**” Image and retrieve it with Photoshop
2. Download the “**Snoopy**” Image and retrieve it with Photoshop
3. Click on the **Select** Menu item at the top of the screen, drag down to the menu item **All**
4. Click on the **Edit Menu and Copy** the image
5. Return to your original image ”dog house in back yard”
6. Paste the Snoopy Image onto the “back yard” image
7. You should see Snoopy appear. Notice that there is a new layer in the layer menu on the right side of the screen.
8. Click twice on the “Layer 1” name and change it to snoopy.
9. Select the Magic wand tool in the tool bar on the left side of the screen.
10. Click on the white background around Snoopy, this will select the area.
11. Press the Delete key.
12. Hold down the **Ctrl key** and press the letter **T** key (this is for Transform)
13. Resize Snoopy as needed.
14. Click on the Move tool and put Snoopy on top of the doghouse.
15. Download and Retrieve the images, Charlie Brown, Lucy Schroder and Woodstock.
16. Follow the steps above to create the Composite Peanuts Picture
17. After the composite image has been created, Add the Title to the image.

(The Final version of the Composite Image is on the back of paper)

Peanuts
