Sequence Photography w/ Photoshop

1. **Retrieve** the images with Photoshop, in the sequence that you wish to use, to create your Sequential Photograph.

2. Select the **File Menu** in Photoshop
   a. Then select **Scripts**
   b. Then select **Load Files into Stack**
3. You will see the following menu.

4. Click on **Add Open Files**, You should see the names of the photos that you retrieved with Photoshop.

5. Click on the check box next to **Attempt to Automatically Align Source Images**

6. **Click OK**

7. You will see a new Photoshop image created with each of the images retrieved placed as a new Layer in the image.

8. Click on the first layer and add a mask to it.
9. Select the eraser tool and go over the area of the second layer action area.
10.   The second image should be revealed.
11.   Select the main layer menu and go down to the item merge down, select it.
12.   Continue by selecting the next layer and follow the previous steps.
