Digital Photography Shooting Assignment  
**Sequence Photography**

**Directions:**

Choose 2 different subjects in motion and take a series of stop action photos using the camera in "*Sports Mode*". One image selected for submission must contain an overlapping subject. Think creatively when selecting your subjects and be aware of lighting conditions which may cause the camera to select too slow of a shutter speed.

**Process for Shooting Images:**

1. Set the camera Mode Dial to "*Sports Mode*".
2. Place your camera on a tripod, or on a table top that will not move while taking your sequence of images.
3. Take your sequence of images relating to a moving object or person. The amount of images that you take and use in your sequence image will vary depending on your theme/movement.
4. Transfer your sequence of images to the computer and save in your H: drive in a folder title 'Sequence Photography'.
5. **Now Follow the procedure sheet for creating a Sequence Photograph.**
