Digital Photography Shooting Assignment

Activity 1: Taking, Transferring, and Emailing Images

Directions:

You will be required to shoot *FIVE* different images within the classroom while using the camera in AUTO mode. This will be one of the two times that you will use AUTO mode to take pictures in class. While taking pictures, make sure that you try to include lines into the images. This will make them more interesting.

Process:

1. Insert your SD card into the memory card slot.
2. Turn the digital camera on by using the Power Dial.
3. Set the Mode Dial to "AUTO".
4. Take *FIVE* different images around the classroom.
5. Transfer your *FIVE* images to the computer following the instructions provided on the "How to Transfer Images" file.
6. Remove your SD card from the memory card reader after transferring your images, and place it back in the proper container located in the photography cabinet.
7. Select *TWO* images and rename them with a file name using the following format: File 1 should be named **LastName_FirstName_Assign1A**, and File 2 should be named **LastName_FirstName_Assign1B**.
8. After you have renamed the images you selected, send them to the instructor's email using the following subject format **LastName_FirstName_Assignment1_Per_#**. Each image must be attached as a .JPG file.
9. After sending the email, confirm that your email has been received by the instructor.
