Digital Photography Shooting Assignment
Forced Perspective

Directions:

Through the use of scaled objects and visual perception you are to create Forced Perspective images. Be creative, take your time and think about how to manipulate your subjects to get the best result. Shoot as many images as you can in the given allotted time in order to have a wide selection to always choose from.

Tips/ Hints:

- Think about DOF using the aperture and be prepared by bringing a tripod.
- Think about DOF in relation to subjects and focusing.
- Think about portrait vs. landscape during framing of image.

Shooting Images:

1. You will be responsible to create two Forced Perspective images
2. Set the camera Mode Dial to *“Manual”*.
3. Depth of Field is critical to making the image work
4. Use a small Fstop to insure good DOF. (F22,f16)
5. Set your camera on at least 800 ISO
