Digital Photography 2

Name_____

Macro Photography

Using at least four different objects of different textures, take 3 pictures using 3 different diopter lenses. Then take 3 pictures using 3 different extension tubes. You will be graded on your ability to set-up the object to be photographed, provide effective lighting, focus manually, and manually expose the image. Quality is critical to successful completion of this activity.

Using the table below, shoot your objects using different macro lenses and write down the corresponding data for the shot. Label each photo taken with the number of the shot for later evaluation.

Shot Number	Diopter Magnification	F stop	Shutter Speed	
Shot #1				
Shot #2				
Shot #3				
	Extension Tube Magnification	F stop	Shutter Speed	
Shot #4				
Shot #5				
Shot #6
